To Whom It May Concern

Dear Sir/Madam

Re: Dendrite Clinical Systems Limited

I have been on the Council of BSIR for 25 years and was President of that Society 2008 to 2010. Through that time the British Society for Interventional Radiology has built up an extremely good working relationship with Dendrite Clinical Systems Limited. The company has helped us develop and progress six technique orientated national registries. Through our website they have enabled us to enter data easily and efficiently and for our index procedure we are now able to instantly download personalised outcomes in the form of funnel graphs.

For each of those registries Dendrite have helped enormously in the analysis of data to enable us to publish reports for our members. Those reports have been very professionally produced and Dendrite have always gone the extra length to ensure the quality of that publication.

Peter Walton as Managing Director throughout this time has been extremely supportive and with his depth of knowledge regarding national audits has been extremely helpful in guiding us down the correct path.

I would have no reluctance in recommending Dendrite to any clinical group wishing to develop national registries and audit.

Yours sincerely

**Professor P A Gaines FRCP FRCR
Recent Past President of BSIR
Consultant Vascular Radiologist**
