BOARD OF TRUSTEES

Re: Dendrite Clinical Systems Ltd.

CHAIRMAN:
Mr Patrick Burgess

I have pleasure to share with you my experience of working with Dr Peter Walton, Managing Director at Dendrite Clinical Systems and his team.

Miss Joanna Kaye
Mr Karl Sanne
Mr Guy Weston
Professor Ajay Kakkar
Dr Jeffrey Herbert

The technical expertise and operational excellence of Dendrite Clinical Systems allowed our Institute to successfully develop and implement the first global and largest prospective, clinical Registry Study in Atrial Fibrillation which is planned to enrol 55,000 patients in more than 1,000 centres and up to 50 countries (the GARFIELD Registry - Global Anticoagulant Registry in the Field).

CHAIRMAN:
COURT OF PATRONS
Marquess of Salisbury PC DL

Dendrite has developed the global Registry database and an electronic Case Report Form, which will allow collecting a unique breadth of patient data in a minimum of 20 languages and over the period of 6 years.

DIRECTOR:
Professor Ajay Kakkar

Our Registry study includes experienced academic research centres as well as office based physicians with less research experience. Dendrite was instrumental in training and coaching local investigators on the EDB and thus supported a most successful study implementation across Europe, Asia, Australia and in the Americas.

Besides the development, management and maintenance of the registry database, Dendrite is ensuring data validation, query generation and the composition of regular metrics reports.

The experience and professionalism which Dendrite has proven during the past two years of our collaboration was always accompanied by a high sense of urgency and a strong focus on user friendly solutions. The Dendrite team is much appreciated due to the ability to partner and successfully collaborate with our multi-functional in-house research teams and a global expert network.

On behalf of the Thrombosis Research Institute I can recommend Dendrite Clinical Systems as a highly competent partner in the conduct of global clinical studies.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Iris Mueller'.
